Employee Attrition Analysis

1.47K

Total Employees

16.1%

Attrition Rate

6.50K

Avg Monthly income

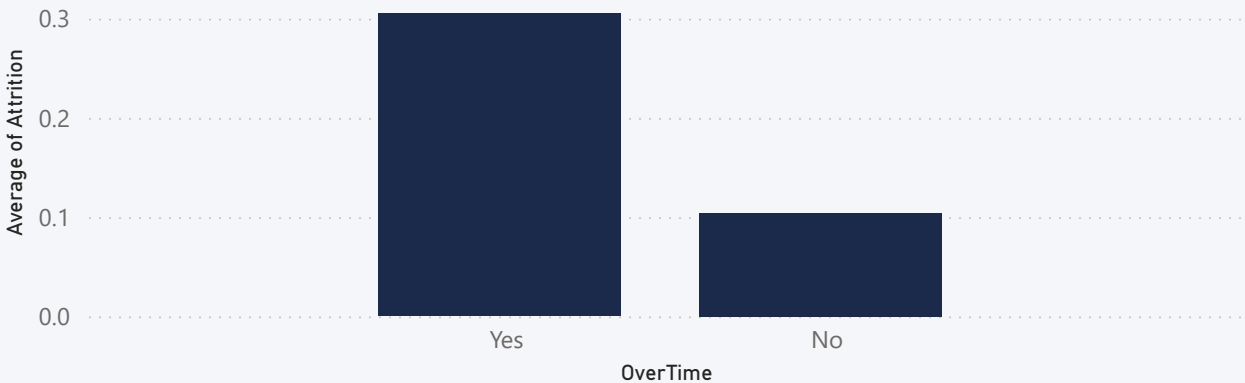

28.3%

Overtime Rate

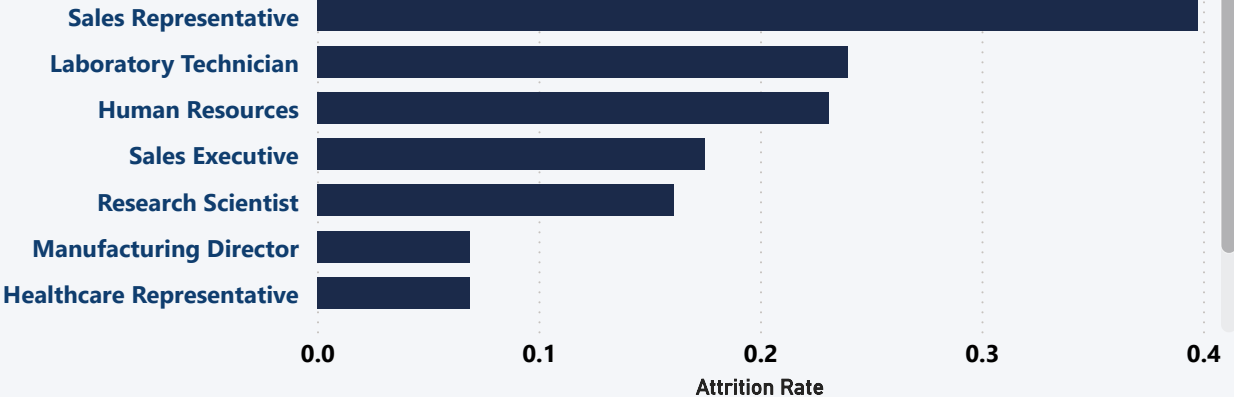

11.28

Average Tenure

Overtime employees show significantly higher attrition

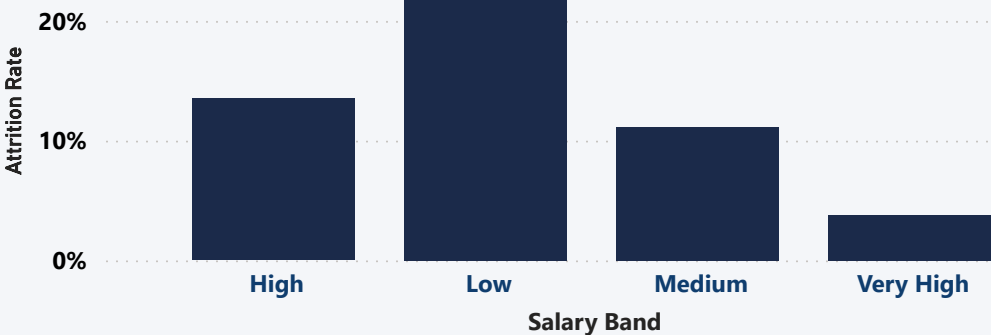

Sales Representatives Are 2.5× More Likely to Leave Than Any Other Role

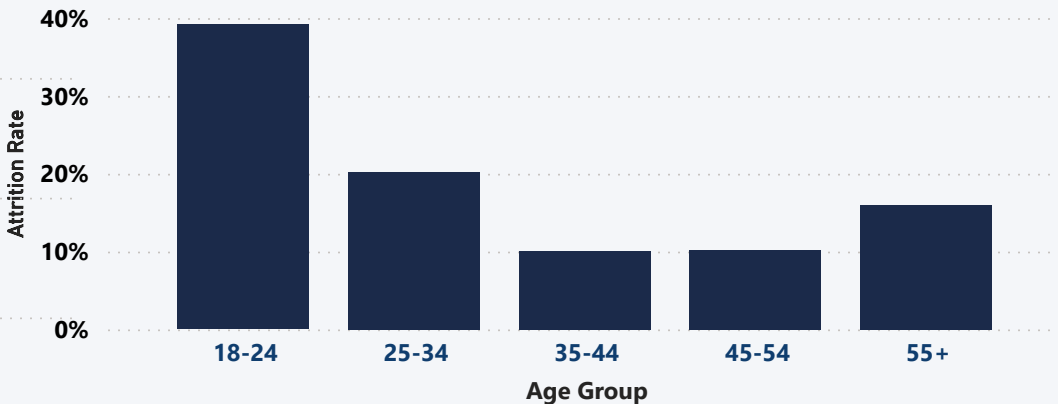

OBSERVATIONS

- Sales Representatives show highest turnover
- Employees working overtime show significantly higher attrition
- Early-career employees (18-24) have highest exits
- Lower salary bands show elevated attrition

Low Earners Leave at Twice the Rate of High Earners

Early career Employees (18-24) have the highest attrition rate

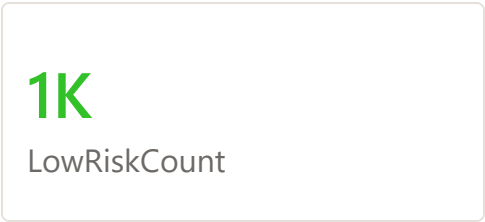

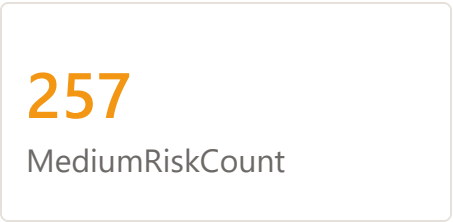

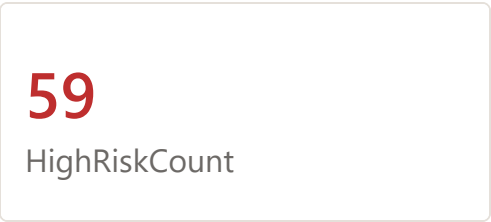

INSIGHTS

- 1. Sales Representatives + Overtime + Low Salary
- 2. Employees aged 18–24
- 3. High overtime employees across departments
- 4. Low salary employees with short tenure
- 5 Employee exits are concentrated during early tenure stages, suggesting onboarding and first-year engagement gaps.

Recommended Actions

- Introduce overtime controls
- Create mentorship for early-career employees
- Review compensation structure
- Design targeted retention plans for sales
- Prioritize retention initiatives for employees within their first 3 years, where attrition concentration is highest.

Department * Overtime Attrition

Department	No	Yes	Total
Sales	13.8%	37.5%	20.6%
Human Resources	15.2%	29.4%	19.0%
Research & Development	8.6%	27.3%	13.8%
Total	10.4%	30.5%	16.1%

Project Methodology

- Cleaned employee dataset
- Created age and salary segments
- Built DAX measures
- Conducted attrition segmentation analysis
- Developed employee risk model
